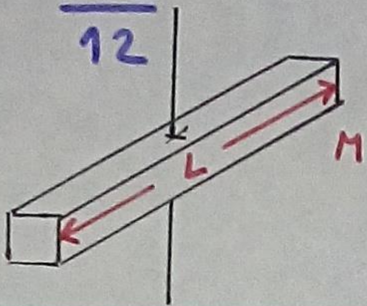
Momento de Inercia:

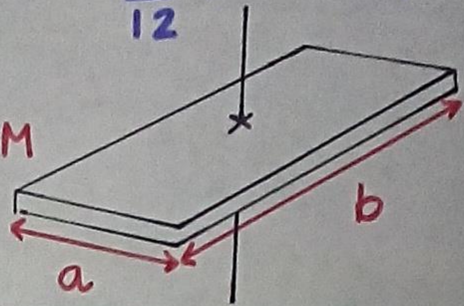
Barra:

$I_{cm} = \frac{ML^2}{12}$



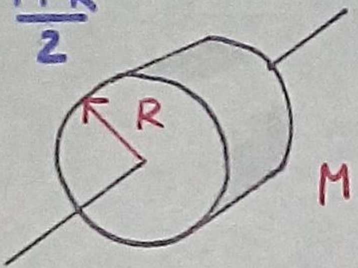
Placa Rectangular:

$I_{cm} = \frac{M}{12}(a^2 + b^2)$



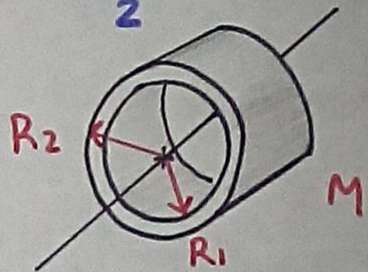
Cilindro Sólido:

$I_{cm} = \frac{MR^2}{2}$



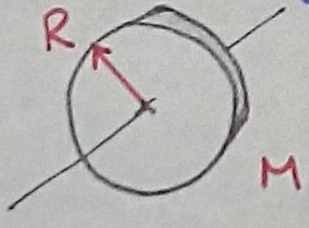
Cilindro hueco:

$I_{cm} = \frac{M}{2}(R_1^2 + R_2^2)$



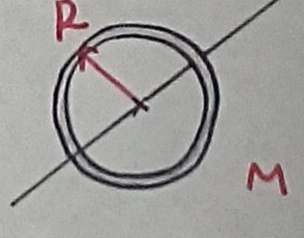
Disco:

$I_{cm} = \frac{MR^2}{2}$



Anillo:

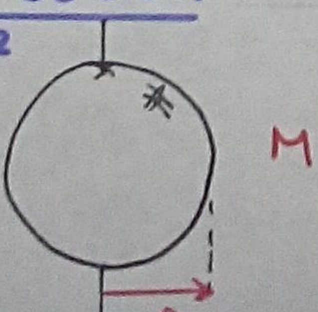
$I_{cm} = MR^2$



Esfera sólida:

$I_{cm} = \frac{2}{5}MR^2$

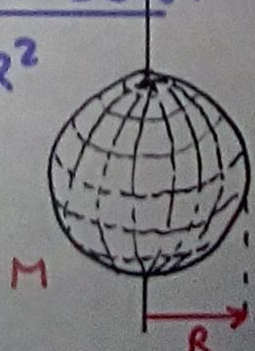
es 2/5



Esfera Hueca:

$I_{cm} = \frac{2}{3}MR^2$

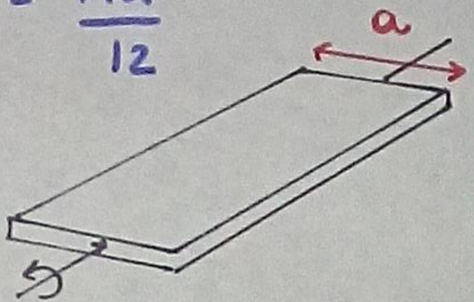
es $\frac{2}{3}$



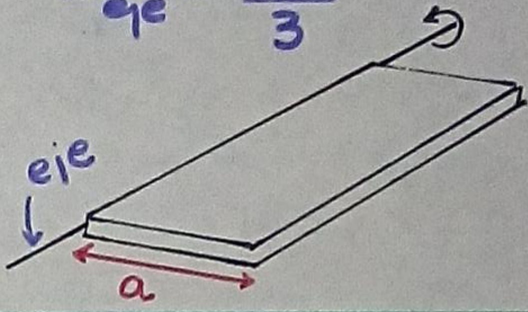
Momento de Inercia:

Placa Rectangular

$$I_{cn} = \frac{Ma^2}{12}$$

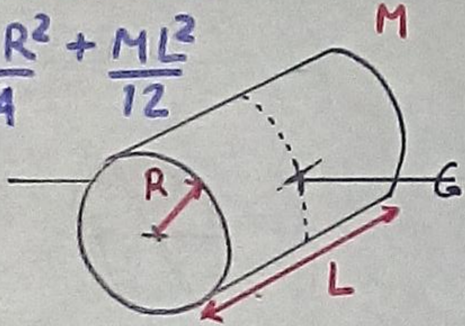


$$I_{eje} = \frac{Ma^2}{3}$$



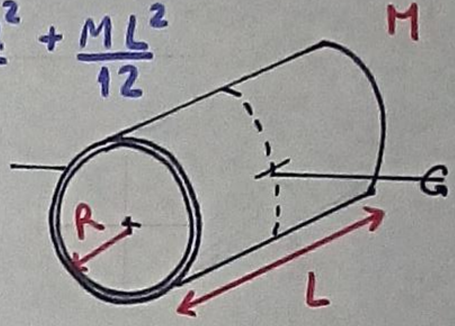
Cilindro Sólido

$$I_{cn} = \frac{MR^2}{4} + \frac{ML^2}{12}$$



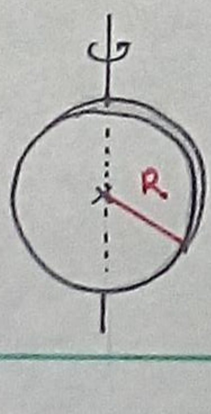
Cascara Cilíndrica

$$I_{cn} = \frac{MR^2}{2} + \frac{ML^2}{12}$$



Disco:

$$I_{cn} = \frac{MR^2}{4}$$



Anillo:

$$I_{cn} = \frac{MR^2}{2}$$
