

Resolver desigualdad.

$$\log_{\frac{7}{8}}(g(x) - x^2 - 25x) > \log_{\frac{7}{8}}(g(x))$$

$$g(x) - x^2 - 25x > 0 \rightarrow (-\infty, 27)$$

$$g(x) - x^2 - 25x < 0 \rightarrow (27; +\infty)$$

Solución

$$\frac{7}{8} [\log_{\frac{7}{8}}(g(x) - x^2 - 25x)] > \frac{7}{8} [\log_{\frac{7}{8}}(g(x))] \quad \left[\frac{7}{8} < 1 \right] \checkmark$$

$$(g(x) - x^2 - 25x) < (g(x))$$

$$-x^2 - 25x < 0$$

$$0 < x^2 + 25x \rightarrow x(x + 25)$$

$$x = 0$$

$$x + 25 = 0$$

$$x = -25$$

$$(-\infty; -25) \cup (0; \infty) \rightarrow (-\infty; 27)$$
